I-Suite 11.01.00 Release Notes

Date: June 13, 2011
Version: I-Suite Version 11.01.00

- **Description:** The primary focus of this release is to support the Windows 7 and Server 2008 operating systems, improve Cost Module calculations, improve Supply Module functionality, and to address several outstanding application defects.

  Refer to the I-Suite Install or Windows 7 Quick Reference Card for setup instructions:

  http://isuite.nwcg.gov/User_Support/index.html

Important things to know prior to installing I-Suite Full Server Windows 7 and Windows Server 2008

- **Windows 7 or Server 2008must use the Version 11.01.00 Full Server Install**. A Windows 7 or Server 2008 Client install for version 11.01.00 is not available at this time.

- System Administrative privileges **are** required to install the application.

- The I-Suite Server machine must **run as Administrator** to perform many of the database administrative functions, e.g. Attach and Detach databases

- Server Installs configured as clients will operate without administrative privileges

- The new database version is 11.01.01. Previous Version 10 databases are automatically updated to the new database version the first time the database is connected to the server computer. This may take several minutes depending on the size of the database. *(New reference data will not be included in updated 10.01.02 databases)*

- Install the same version of I-Suite on all server and client computers.

Important things to know prior to installing I-Suite Version 11.01.00 Full Server and I-Suite Version 11.01.00 Client
Windows XP

- The Full Server and Full Client install can both be installed mid-incident. Run a backup of your database prior to updating I-Suite.

- System Administrative privileges **are** required to install the application.

- The new database version is 11.01.01. Previous Version 10 databases are automatically updated to the new database version the first time the database is connected to the server computer. This may take several minutes depending on the size of database. *(New reference data will not be included in updated 10.01.02 databases)*

- Install the same version of I-Suite on all server and client computers.

**Important things to know prior to installing I-Suite Version 11.01.00 Server Update
and I-Suite Version 11.01.00 Client Update
Windows XP Only**

- Only install this update on a computer with I-Suite version 10.01.02 already installed

- The Full Server and Full Client install can both be installed mid-incident. Run a backup of your database prior to updating I-Suite.

- System Administrative privileges **are** required to install the application.

- The new database version is 11.01.01. Previous Version 10 databases are automatically updated to the new database version the first time the database is connected to the server computer. This may take several minutes depending on the size of database. *(New reference data will not be included in updated 10.01.02 databases)*

- Install the same version of I-Suite on all server and client computers.

    Important Note: When uninstalling Version 11 that was updated from Version 10, Install Shield will reference Version 10 on the uninstall screens. The displayed Version will not affect the uninstall process.

Please visit the I-Suite Web site for addition information on the installation process and user documentation (http://isuite.nwcg.gov).

Summary Release Information

The following table contains a summary of the changes included in this release:

General		
QC ID	**Module/Process**	**Summary**
1387 1463	General	• I-Suite Full Server install will now install and operate on Windows 7 and Server 2008 operating systems. (See special install QRC for more details) • Improved screen refresh after saving data and when moving between modules
1214 1292 1425 1569	General/Custom Reports	• Custom reports that do not contain the request number as part of the data set will now run correctly. • The custom report designer show/not show field functionality is operating correctly. • Other 1, 2, 3 fields are now available in the Custom Reports vDemob view. • Permissions for custom report views were reviewed and updated.
